Peer-graded Assignment: R Markdown and Leaflet

Submit by September 16, 11:59 PM PDT

Important Information

It is especially important to submit this assignment before the deadline, September 16, 11:59 PM PDT, because it must be graded by others. If you submit late, there may not be enough classmates around to review your work. This makes it difficult - and in some cases, impossible - to produce a grade. Submit on time to avoid these risks.

ⓘ It looks like this is your first peer-graded assignment. Learn more   ✕

Instructions

My submission

Create a web page using R Markdown that features a map created with Leaflet.

Discussions

Host your webpage on either GitHub Pages, RPubs, or NeoCities.

Your webpage must contain the date that you created the document, and it must contain a map created with Leaflet. We would love to see you show off your creativity!

Review criteria   less ⌃

The rubric contains the following two questions:

1. Does the web page feature a date and is this date less than two months before the date that you're grading this assignment?

2. Does the web page feature an interactive map that appears to have been created with Leaflet?

Example Submissions   less ⌃

Here's an extremely minimal passing example, but we hope your submission is much cooler!
